PROFESSIONAL PROFILE / WEB · SOFTWARE · DIGITAL TECHNOLOGY

Mira Chowdhury

TT

WEB & SOFTWARE DEVELOPMENT | FRONTEND · APPLICATION DEVELOPMENT · TECHNICAL PROBLEM-SOLVING

LOCATION Jashore, Bangladesh PHONE 01728682807 GITHUB github.com/gamertoky1188gro

01 PROFESSIONAL PROFILE

Self-directed web and software development practitioner with practical experience exploring and building modern application workflows. Focused on creating clear, responsive web interfaces and understanding how frontend applications connect with backend services, APIs and databases. Familiar with JavaScript-based development using React, Node.js and related tools, as well as cross-platform application concepts. Approaches technical challenges with curiosity, structured investigation and a willingness to learn unfamiliar technologies. Seeking an opportunity to contribute dependable work, strengthen engineering skills and grow through real product and team experience.

Professional focus: Web application development · Frontend implementation · Software fundamentals · API and data integration · Cross-platform technology

02 TECHNICAL SKILLS & TECHNOLOGY

Frontend & Web	HTML5, CSS3, JavaScript, React, Tailwind CSS, Vite, responsive layouts, reusable UI components and modern web application structure.
Backend & APIs	Node.js, Express, REST API concepts, client–server communication, request/response workflows and application integration fundamentals.
Databases & Services	PostgreSQL, Supabase, relational data concepts, authentication and connecting application interfaces to data services.
Mobile & Cross-platform	React Native, Expo and cross-platform application development fundamentals.
Developer Tooling	Git, GitHub, terminal and command-line workflows, package-based JavaScript development and technical documentation research.
Operating Systems	Linux (Debian-based environments), system configuration, command-line troubleshooting and practical software setup.

03 AREAS OF TECHNICAL CAPABILITY

Interface Development
Structuring page layouts, styling responsive interfaces, organizing reusable components and keeping user experiences clear and consistent.

Application Fundamentals
Understanding how frontend, backend services, routes, APIs and persistent data work together in an application.

Technical Investigation
Breaking issues into smaller steps, reviewing errors and logs, testing likely causes and researching practical fixes.

Continuous Technical Learning
Learning through documentation, experimentation and adapting to unfamiliar frameworks, tools and development workflows.

04 PROFESSIONAL STRENGTHS

- Self-directed learning and technical curiosity
- Care for usability and interface consistency
- Adaptability across tools and environments
- Written communication and asynchronous collaboration
- Logical, step-by-step problem-solving
- Persistence when investigating technical issues
- Attention to detail and responsible work habits
- Openness to feedback and continuous improvement

05 WORKING STYLE & COLLABORATION

Comfortable working independently on clearly defined tasks, researching technical questions and communicating progress in writing. Values readable implementation, practical solutions, thoughtful testing and clear expectations. Open to learning team conventions, receiving code or task feedback, and collaborating across distributed workflows.

06 OPPORTUNITY & WORK PREFERENCES

Interested in suitable **entry-level, junior, trainee, internship, freelance and contract opportunities** related to web development and software. Remote-first preference; open to working with local or international teams and communicating through written, asynchronous channels.

07 LANGUAGES & LOCATION

Bangla: Fluent **English:** Good working proficiency (self-assessed) **Based in:** Jashore, Bangladesh
